bellavista ANZ  
Paul McWilliam

Dear Partner,

### The AnimatedLung – clear, understandable, improved

The **continuous optimization** of our bellavista ventilator range is one of our main goals. Users of bellavista ventilators can now benefit from a **significant improvement** - the [AnimatedLung](#).

### The patients lung condition at a glance

A graphical pulmonary display provides a useful way to **understand and interpret lung mechanics** and **respiratory parameters**.<sup>1</sup> The new, three-dimensional [AnimatedLung](#) precisely shows the condition of the lung breath by breath.

Users recognizes at a glance the **ventilation process** and the **status of compliance** and **resistance** of the **ventilated lung**. The animation is **easy and fast to grasp**, which significantly improves the applicability of the ventilation device in everyday life. The conditions of the single lung areas are now displayed clearly.

### Available as an update

Buyers of our latest ventilator, the [bellavista 1000e](#), automatically benefit from the [AnimatedLung](#).

In bellavista 1000, the AnimatedLung is integrated as a feature with the options **Expert Monitoring, Lung Mechanics** or [Adaptive Ventilation Mode](#). These

software options can be added at **any time to your [bellavista ventilator](#)**.

Would you like to **know more** about our **new AnimatedLung**? **Further information** can be found in our detailed [Flyer](#).

## Release Note 9

Recently, imtmedical released the software updates V4.3.260.0 for the ventilators [bellavista 1000](#) and [bellavista 1000 neo](#) as well as V6.0.123.0 for the [bellavista 1000e](#). For users, these updates bring **several relevant improvements**. These include the new AnimatedLung with enhanced clarity, a new apnea alarming time setting range in **neonatal and pediatric mode** and new manuals in **12 different languages**, which can be **accessed directly from the device**. You can download the updates via our software platform iVista. In **new bellavista ventilators**, the abovementioned features are **already integrated**. For more information download the release note 9 [here](#).

## Invitation to the business partner meeting

Right before the opening of the **Medica 2017**, our next business partner meeting will take place at the [Mercure Hotel Dusseldorf Sud](#). We kindly invite you to this event on **Sunday, November 12th**. On this day, we present you several new devices and services from [imtmedical](#), which promise a lot of innovative spirit and highest reliability in challenging moments. The participation is **free of charge**. We are grateful for an **early registration**. Please note that **hotel reservations must be made personally** and that you **secure your hotel room** in good time. We will provide you with **more information** about the business partner meeting in the coming weeks. The possibility to

**register directly** can be found [here](#).
